# EXECUTIVE SUMMARY

## ***Background and Purpose***

- A visitor exit survey is a tool used to profile visitors and estimate their impact on a destination. It can capture visitor demographics and trip characteristics such as travel party size and composition, the purpose of their trip, regions visited, length of stay, type of accommodation used, activities participated in, expenditures, and trip evaluation.
- This report presents data collected via the 2023 PEI Travel Survey of Visitors (Exit Survey), from January 1<sup>st</sup> to December 31<sup>st</sup>, 2023, from only overnight pleasure visitors to PEI.
- For analysis purposes, the data was separated into the following five tourism seasons: 1) winter off-season (January 1 - April 30, 2023); 2) spring shoulder season (May 1-June 30, 2023); 3) summer main season (July 1-August 31, 2023); 4) fall shoulder season (September 1-October 31, 2023); and 5) winter off-season (November 1-December 31, 2023).
- The main purpose of this report was to provide a full range of statistics on the volume of overnight pleasure travellers to ***the Green Gables Shore (GGS) region*** in PEI during the study period (2023) and detailed characteristics of their trips such as purpose of trip, travel party size and party composition, PEI regions visited, activities participated in, travel expenditures, evaluation of trip, and demographic information about the overnight pleasure travellers.

# EXECUTIVE SUMMARY (cont'd)

## ***Samples Used and Margin of Error***

- In total, 2,780 surveys were used in the study (overnight pleasure travellers to the GGS region; 26.9% of total samples used).
- In terms of statistical accuracy, a sample of this size has a sampling error of  $\pm 1.84$  percent, at a 95 percent confidence level. It is important to note, that the information presented in this report are estimates to provide guidance only. Please exercise caution when interpreting significance of results throughout this report.

## ***Travel Market Overview in 2023***

- In total, over 1.61 million people visited PEI during the study period. This includes 119,500 cruise ship passengers (7.4% of total visitors) and 9,700 motor coach tourists (0.6% of total visitors). Of these, approximately 565,400 visitor parties (1,486,300) were estimated to have visited PEI in 2023 by way of the three exit points (excluding cruise travellers and motor coach tourists).
- Approximately 80 percent of these parties (451,400 parties) stayed at least one night in PEI (overnight visitor parties), while the remaining 114,000 parties (20%) visited PEI for a day trip (same-day visitor parties).
- Of these overnight visitor parties, while 91 percent (411,500 parties) primarily visited PEI for pleasure purposes including other purposes, 9 percent (39,900 parties) visited PEI for business purposes.

# EXECUTIVE SUMMARY (cont'd)

## ***PEI Regions Visited***

- The region of PEI that was visited by the greatest percentage of ***all visitor parties*** was the Greater Charlottetown Area (70% of visitor parties). This was followed by the Green Gables Shore region (48%), the Summerside area (35%), the Red Sands Shore region (29%), the Points East Coastal Drive region (28%), and the North Cape Coastal Drive region (20%).
- Looking at PEI regions visited by ***overnight pleasure visitor parties***, the Greater Charlottetown Area (71%) was the most popular region for overnight pleasure travel parties, followed by the Green Gables Shore region (56%), the Summerside area (38%), the Points East Coastal Drive region (34%), the Red Sands Shore region (30%) and the North Cape Coastal Drive region (23%). Note that a “visit” was defined as dining, visiting an attraction, or participating in an activity in the region, and not travelling through the region only.

## ***Overnight Stays in the GGS Region***

- It was appeared that the Green Gables Shore region was the second most popular tourism region in PEI in terms of overnight stays by ***all types of overnight visitor parties***. Approximately 29 percent of all overnight visitor parties stayed at least one night in the GGS region and seven percent of total accumulated nights in PEI (2,011,550 nights) was spent in the GGS.
- Approximately 31 percent of ***overnight pleasure travel parties*** stayed at least one night in the GGS region and eight percent of total accumulated nights in PEI (1,901,043 nights) were spent in the GGS.

# EXECUTIVE SUMMARY (cont'd)

## ***Trend in Number of Visitors to the GGS Region***

- According to the PEI Tourism Volume Model estimation, approximately 1.62 million individual travellers visited PEI, an increase of 15 percent from the 1.40million in 2022 and a decrease of 1 percent from the 1.63 million recorded in 2019.
- Estimated total number of visitors to the GGS region in 2019 was approximately 906,300 people. Compared to this year, visitation to the GGS has been steadily recovered at 77 percent in 2022 and 84 percent in 2023.
- It was estimated that a total of 762,300 non-resident travellers visited the GGS region through the three exit and entry points in 2023, an increase of nine percent from the 696,800 in 2022.
- Of 411,500 overnight pleasure travel parties to PEI, 128,400 parties (31%) counted as having stayed at least one night in the GGS region. These pleasure parties or individual travellers are the focus of this report.

# EXECUTIVE SUMMARY (cont'd)

## *Who Visits the GGS Region*

- Of all GGS overnight pleasure travel parties, approximately 91 percent of parties were from Canada, eight percent were from the United States, and one percent were from other international markets (i.e. a country other than the United States and Canada).
- The geographic markets that made up the greatest proportion of GGS overnight pleasure parties were New Brunswick (29%), Nova Scotia (26%), Ontario (17%), Quebec (15%), and Alberta and British Columbia (3%).
- In terms of travel party characteristics, 42 percent of GGS overnight pleasure travel parties travelled to PEI with their spouse/partner (two people), 21 percent travelled with their immediate families (including children under 18 and/or over 18), seven percent were single travellers, and seven percent travelled with their friends.
- Looking at party composition, the majority of GGS overnight pleasure travel parties were comprised of only adults (72%) while 28 percent considered families which were adult(s) with child(ren).
- Regarding age composition, 44 percent of GGS overnight pleasure travel parties were senior travellers (55 and over), seven percent were middle aged travellers (35 to 54), and five percent young adult travellers (18 to 34).
- About 16 percent of GGS overnight pleasure travel parties were comprised of travellers of varying age generation and 28 percent were families (adults with children).

# EXECUTIVE SUMMARY (cont'd)

## *Who Visits the GGS Region (cont'd)*

- The average party size for GGS overnight pleasure travel parties was 3.29 people. While the average party size was highest during the July-August summer main season at 3.62 people, the average party size was lowest during the November-December winter off-season and January-April winter off-season at 2.19 and 2.23 people, respectively.
- Looking at individual overnight pleasure travellers to the GGS, they were comprised of slightly more males than females (50.2% versus 49.8%).
- Approximately 20 percent were aged between 55 and 64, 19 percent were aged between 65 and 74, 13 percent were aged between 35 and 44, and 13 percent were aged between 45 and 54.
- Overall, approximately 77 percent of GGS overnight pleasure travel parties had previously visited PEI. The majority of these parties had last visited PEI recently: 34 percent had last visited one year ago, and 24 percent had last visited earlier in the same year of the trip in which they were surveyed.
- On average, repeat GGS overnight pleasure travellers had visited PEI approximately 4.2 times in the past five years.

# EXECUTIVE SUMMARY (cont'd)

## *Why Visitors Come*

- Approximately 64 percent of GGS overnight pleasure travel parties indicated that they visited PEI for holiday or vacation, 16 percent travelled for short getaway, and nine percent travelled to PEI for visiting relatives and/or friends.
- Approximately 29 percent of GGS overnight pleasure travel parties indicated they were primarily attracted to PEI by “beaches and coastline” and 19 percent were attracted by “natural beauty and pastoral settings”.
- Restful and relaxing place (17%), other features (8%), outdoor activities (7%), world of Anne of Green Gables and L.M. Montgomery (5%), golf (5%), festivals, events, or concerts (4%), and culinary/food-related experiences (3%) were attracted other GGS overnight pleasure travel parties to PEI. Note that “other features” consisted of family or friends related issues.

# EXECUTIVE SUMMARY (cont'd)

## ***How Visitors Come***

- Approximately 80 percent of GGS overnight pleasure travel parties entered and exited PEI via the Confederation Bridge, 11 percent used a combination of bridge and ferry, five percent flew in and out of PEI, three percent used the ferry service between PEI and Nova Scotia to enter and exit the province, and one percent used a combination of air and bridge/ferry.
- Approximately ten percent of GGS overnight pleasure travel parties used a rental car while travelling to PEI. Approximately 37 percent picked up the vehicle in Nova Scotia and seven percent picked it up in New Brunswick while 37 percent of those who used a rental car picked up the vehicle on PEI.

## ***Where Visitors Stay***

- The vast majority of GGS overnight pleasure travel parties (87%) indicated that PEI was the primary destination of their pleasure trip.
- Overall, GGS overnight pleasure travel parties to PEI stayed on average 5.54 nights (4.53 nights in paid accommodations in PEI and 1.47 nights in paid accommodations in PEI through a peer-to-peer lodging website such as Airbnb, VRBO, etc.).

# EXECUTIVE SUMMARY (cont'd)

## *Where Visitors Stay (cont'd)*

- GGS overnight pleasure travel parties also spent overnight in other PEI regions. Approximately 13 percent of GGS overnight pleasure travel parties stayed overnight in the Greater Charlottetown Area, nine percent of parties stayed overnight in the Points East Coastal Drive region, six percent in the Summerside Area, five percent in the North Cape Coastal Drive region, and three percent in the Red Sands Shore region with the average length of stays of 0.28, 0.23, 0.13, 0.12, and 0.06 nights, respectively.
- Although GGS overnight pleasure travel parties stayed in a variety of accommodation types while on PEI, the most popular type of accommodation was cottage or cabin (39% of parties stayed at least one night in this accommodation type), with the average length of stays of 1.98 nights.
- Excluding the Green Gables Shore region, the Greater Charlottetown Area was the most popular region for visitation among GGS overnight pleasure travel parties (62% of GGS overnight pleasure travel parties visited the region), followed by the Summerside Area (40%), Red Sands Shore region (33%), the Points East Coastal Drive region (32%), and the North Cape Coastal Drive region (26%).

# EXECUTIVE SUMMARY (cont'd)

## ***What Visitors Do***

- GGS overnight pleasure travel parties participated in a variety of activities while travelling in PEI. Going to a beach was the most popular activity (75%).
- Over the full-year, other popular activities took part in by GGS overnight pleasure travel parties included
- driving tour for scenic drives/views (71%), going to a full-service restaurant (61%), visiting a national or provincial park (59%), shopping for local products (59%), sightseeing, appreciating pastoral or rural settings (55%), shopping for general merchandise (48%), sampling local culinary products (47%), seeing natural wonders (47%), visiting historic/heritage sites or cultural attractions (35%), visiting Anne of Green Gables and related attractions (30%), visiting friends and/or relatives (27%), using the Confederation Trail or other trails (25%), visiting a theme, fun or amusement park (21%), going to a museum or art gallery (20%), participating in water-based activities (17%), participating in nature-based outdoor activities (16%), playing golf (12%), attending a live performance/entertainment (11%), and attending a festival, event, or concert (11%).

# EXECUTIVE SUMMARY (cont'd)

## *What Visitors Spend*

- Total direct expenditures by GGS overnight pleasure travel parties were estimated at more than **\$312 million** based on 128,399 overnight pleasure travel parties or 422,852 individual overnight pleasure travellers.
- The items that accounted for the greatest proportion of total expenditures were accommodations (40%), food and beverage at restaurants, bars, etc. (17%), shopping (10%), vehicle operation (9%), food and beverage at stores (9%), recreation and entertainment (7%), travel package (5%), other (3%), and car rental and local transportation (2%).
- GGS overnight pleasure travel parties spent an average of \$2,435.56 **per party per night** on PEI. This average spending was highest among those who visited during the July-August summer main season (\$2,698.04) and lowest by those who visited during the January-April winter off-season (\$1,440.03).
- GGS overnight pleasure travel parties spent an average of \$133.48 **per person per night** on PEI. This average spending was highest among those who visited during the November-December winter off-season (\$230.38) and lowest by those who visited during and the July-August summer main season (\$129.71).

# EXECUTIVE SUMMARY (cont'd)

## ***How PEI Rates***

- Visitors were asked to rank various PEI travel services. GGS overnight pleasure travel parties were pleased with aspects of their trip to PEI including the quality of customer service (94%), cleanliness and sanitary conditions (93%), variety of things to see and do (92%), restaurant (92%), accommodation (91%), transportation (85%), and prices of goods and services (68%).
- The ratings for these items were greater than four on a five-point scale from one (very poor) to five (excellent), excluding “prices of goods and services.” “Quality of customer service” received an overall average rating of 4.53 on the same scale while “prices of goods and services” received a lower rating but still favourable at 3.84.
- Approximately nine percent of GGS overnight pleasure travel parties indicated they experienced a problem or had a complaint about their trip to PEI.
- Despite the complaints regarding prices and taxes, etc., 89 percent of GGS overnight pleasure travel parties agreed that their trip to PEI was good value for money spent. Over 95 percent of GGS overnight pleasure travel parties indicated the trip to PEI was a good way to spend their time, PEI was a safe and hygienic destination, and they were satisfied with their trip to PEI.
- Overall, 97 percent of GGS overnight pleasure travel parties agreed they would recommend PEI as a travel destination to others and 94 percent indicated they would visit PEI again.

CONTENTS	PAGE
1. INTRODUCTION	13
1-1. Background of the Study	14
1-2. The Study Purpose	15

## 1-1. Background of the Study

- A visitor exit survey is a tool used to profile visitors and estimate their impact on a destination. It can capture visitor demographics and trip characteristics such as travel party size and composition, the purpose of their trip, regions visited, length of stay, type of accommodation used, activities participated in, expenditures, and trip evaluation.
- Prince Edward Island (“PEI”) has been conducting exit surveys since 1979 with the last study conducted in 2018 and 2019 during the period from July 1, 2018 to June 31, 2019 (the “study period”).
- The 2023 PEI Travel Survey of Visitors (Exit Survey) covered full twelve months from January 1 to December 31. Specifically, data presented in this report is for **overnight pleasure travellers who stayed at least one night in the Green Gables Shore (GGS) region** during the study period to profile their travel related behaviours in the GGS or in PEI.
- For analysis purposes, the data was separated into the following five tourism seasons:
  - Winter off-season (January 1 - April 30, 2023);
  - Spring shoulder season (May 1 - June 30, 2023);
  - Summer main season (July 1 - August 31, 2023);
  - Fall shoulder season (September 1 - October 31, 2023); and
  - Winter off-season (November 1 - December 31, 2023).

## 1-2. The Study Purpose

- The main purpose of this report was to provide a full range of statistics on the volume of overnight pleasure travellers who stayed at least one night in the GGS region during the study period (January 1<sup>st</sup> to December 31<sup>st</sup>, 2023) and detailed characteristics of their trips such as purpose of trip, travel party size and party composition, PEI regions visited, activities participated in, travel expenditures, evaluation of trip, and demographic information about the overnight pleasure travellers.
- The survey pursued seven broad objectives:
  - To update existing historical information on GGS overnight pleasure travellers to PEI,
  - To collect critical data to measure the overall importance of tourism in PEI,
  - To gather information regarding GGS overnight pleasure travellers' behaviours,
  - To identify key market segments of GGS overnight pleasure travellers to PEI, and
  - To enhance our knowledge and understanding of tourism (in general, and for PEI).
- ***Note that this report includes results for those who stayed at least one night in the Green Gables Shore (GGS) region including Cavendish, North Rustico, Hunter River, New Glasgow, Kensington, Stanley Bridge, Stanhope, Darnley, New London, and Dalvay during the study period. Since visitors may have stayed in multiple PEI regions, data presented in this report reflects their entire time in PEI and may include spending, activities, etc., that took place in other regions. Although many visitors would have visited the GGS region for the day only and not spent the night, those visitors' activities, spending, etc., are not included in this report.***
- This report includes GGS overnight pleasure traveller profiles by tourism season.

CONTENTS	PAGE
<b>2. METHODOLOGY OVERVIEW</b>	<b>16</b>
2-1. Sampling Procedure	17
2-2. Sample Summary	19
2-3. Data Processing	21
2-4. Data Weighting	22

## 2-1. Sampling Procedure

### ***Target Population***

- Mail-back questionnaires were distributed to non-resident visitors on PEI during the study period (January 1<sup>st</sup> to December 31<sup>st</sup>, 2023) as they exited PEI via the Charlottetown Airport, the Confederation Bridge, or the Wood Island's ferry terminal.
- The target population did not include cruise ship passengers and crew members, motor coach tourists, refugees, landed immigrants, or military Canadian residents.

### ***Mail-back Questionnaire***

- A representative of survey staff approached departing non-resident visitors at the Charlottetown Airport and drivers of non-PEI vehicles (based on their motor vehicle inspection sticker) at the Confederation Bridge and the Woods Island ferry terminal, explained the research study, and asked the individual if they would be willing to participate. If they agreed to participate, the individual was provided with a package containing the mail-back questionnaire.
- Responding to the survey was voluntary.

## 2-1. Sampling Procedure (cont'd)

### **Online Survey**

- The survey package included a web address for the online version of the survey. Individuals who received the survey package had the option of completing the hard-copy questionnaire or the online version. Both versions of the survey were available in English and French.
- Tourism PEI also sent an email invitation to non-residents who requested PEI travel information between November 2022 and October 2023 and took the ferry when visiting PEI in 2023.
- To better capture respondents who took the ferry when visiting PEI, the 2023 customer list provided by the Northumberland Ferries Limited (NFL) was also used to invite participants to the online survey.

## 2-2. Sample Summary

### *Samples Collected and Used*

- In total, 14,055 surveys were collected. Among these, 10,340 surveys (73.6%) were used to analyze the data for the 2023 exit survey.
- Of these 10,340 surveys, 46 percent were mail-back surveys and 54 percent were online surveys.
- Among these, 2,780 samples (26.9%) were GGS overnight pleasure travel parties and used for this report.

	Surveys Collected		Surveys Used		Use Rate
	<i>N</i>	%	<i>N</i>	%	%
Mail-back Survey	4,794	34.1%	4,760	46.0%	99.3%
Online Survey	9,261	65.9%	5,580	54.0%	60.3%
<b>Total</b>	<b>14,055</b>	<b>100.0%</b>	<b>10,340</b>	<b>100.0%</b>	<b>73.6%</b>

## 2-2. Sample Summary (cont'd)

### ***Sample Size and Margin of Error***

- The margin of error associated with the total sample and the specific sub-groups used (i.e. tourism season) in this report is summarized in the Table below. In terms of statistical accuracy, the actual margin of error for each market will vary slightly due to minor variations in the sample size.
- Overall, a sample of this size for overnight pleasure travellers to the GGS has a sampling error of  $\pm 1.84$  percent at a 95 percent confidence level. The margins of error for the five sub-groups are higher. Please note this is a guideline only. Caution should be applied when interpreting significance testing throughout this report.

	Overnight Pleasure		
	Sample Size	% of Sample Size	Margin of Error <sup>a)</sup>
2023 Jan-Apr Winter Off-Season	56	2.0%	$\pm 12.97$
2023 May-Jun Spring Shoulder Season	507	18.2%	$\pm 4.30$
2023 Jul-Aug Summer Main Season	1,473	53.0%	$\pm 2.53$
2023 Sep-Oct Fall Shoulder Season	670	24.1%	$\pm 3.74$
2023 Nov-Dec Winter Off-Season	74	2.7%	$\pm 11.29$
<b>Full-Year (12 months)</b>	<b>2,780</b>	<b>100.0%</b>	<b><math>\pm 1.84</math></b>

## 2-3. Data Processing

### ***Data Processing and Error Detection***

- All mail-back questionnaires were reviewed manually to determine if they were complete and coherent.
- Data were captured, coded, verified, and then merged with online survey data.
- Electronic verifications were also made to identify any outliers and to correct them.
- Statistical reliability and validity tests, and consistency controls were also conducted during this process.

### ***Data Imputation***

- Some data used in the study were imputed. Data imputation was carried out for all the factors above and for strata that were outside the scope of the questionnaire distribution. For these out-of-scope factors, the characteristics of visitors were estimated using the 2012, 2014 and 2018-2019 PEI exit survey data sets.
- Total imputation was also performed for any in-scope factors that received an insufficient number of surveys for some specific segments to meet minimum requirements (a combination of a minimum number of questionnaires and maximum weight) based on the exit point traffic counts.

## 2-4. Data Weighting

### ***Bias Adjustment***

- For estimation purposes, the responses obtained through the questionnaires must be treated as a simple random sample from the total traffic in each stratum (three exit points, by same-day and overnight visitors, by origin and by month).
- The data may be subject to some degree of “*distribution bias*” since not all categories of visitors are represented in the distribution or to a “*non-response bias*” because the individuals replying may not be representative of the visitor population.

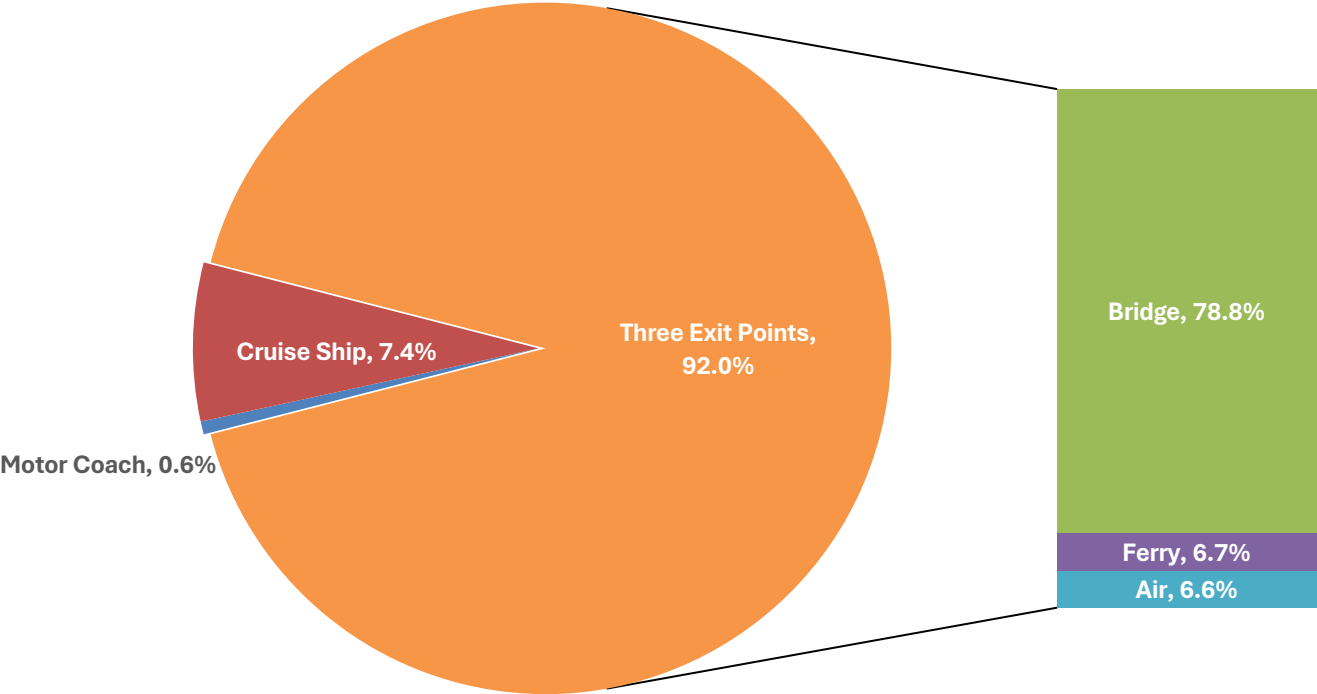

### ***Weighting the Sample***

- Weighting techniques used in the estimation process attempt to reduce the effect of biases and were also performed to determine aggregate visitor parties’ characteristics.
- The final survey sample was weighted by same-day and overnight visitor parties, three exit points, five tourism seasons, and the 22 origins of visitor parties. This aligns with the total PEI visitor parties within the *PEI Tourism Volume Model*, which utilizes traffic data collected through the three exit points.
- Despite the weighting of the sample to address biases, it is important to note that results may not reflect all actual responses of each party or individuals in the party because the application of the weighting scheme was not based on all survey questions.

# 9-1. Rating of Travel Services

Figure 17: Rating of Travel Services by GGS Overnight Pleasure Travel Parties  
(Total Overnight Travel Parties N = 128,399)

	Jan-Apr Winter Off-Season	May-Jun Spring Shoulder Season	Jul-Aug Summer Main Season	Sep-Oct Fall Shoulder Season	Nov-Dec Winter Off-Season	Total Full-Year
Overnight Pleasure Parties N (%)	2,976 (2.3%)	21,453 (16.7%)	74,754 (58.2%)	25,226 (19.6%)	3,990 (3.1%)	128,399 (100.0%)
Quality of customer service	91.7%	96.6%	93.5%	95.2%	93.4%	94.3%
Cleanliness and sanitary conditions	92.8%	94.1%	91.8%	94.2%	94.3%	92.8%
Variety of things to see and do	86.7%	90.2%	92.0%	91.8%	93.1%	91.6%
Restaurant service and quality	98.5%	92.1%	91.4%	89.8%	99.1%	91.6%
Accommodation service and quality	98.0%	90.1%	90.7%	90.4%	99.8%	90.9%
Transportation service and quality	95.1%	82.2%	84.1%	87.2%	99.1%	84.9%
Prices of goods and services	72.7%	69.0%	66.3%	69.4%	73.9%	67.7%

Note: Results were based on those who rated each of the items; while percent (%) indicates the percentage of respondents who rated the item 4 or 5 based on a 5-point Likert-type scale, M indicates mean values; **Green Bold Numbers** indicate significantly higher and **Red Bold Numbers** indicate significantly lower than other seasonal groups, while **Black Bold Numbers** position between the higher and lower groups, at 95% confidence level.

9-2. Instance of Complaints

Figure 18: Instance of Complaints from GGS Overnight Pleasure Travel Parties by Season

Note: **Green Bold Numbers** indicate significantly higher and **Red Bold Numbers** indicate significantly lower than other seasonal groups, while **Black Bold Numbers** position between the higher and lower groups, at 95% confidence level.

### 9-3. Travel Evaluation and Overall Satisfaction

Figure 19: Travel Evaluation and Overall Satisfaction by GGS Overnight Pleasure Travel Parties  
(Total Overnight Travel Parties N = 128,399)

	Jan-Apr Winter Off- Season	May-Jun Spring Shoulder Season	Jul-Aug Summer Main Season	Sep-Oct Fall Shoulder Season	Nov-Dec Winter Off- Season	Total Full-Year
Overnight Pleasure Parties N (%)	2,976 (2.3%)	21,453 (16.7%)	74,754 (58.2%)	25,226 (19.6%)	3,990 (3.1%)	128,399 (100.0%)
My trip to PEI was a good way to spend my time	92.3%	96.7%	97.0%	96.7%	94.9%	96.7%
PEI was a safe and hygienic destination	93.1%	92.3%	96.3%	99.1%	95.0%	96.1%
I was satisfied with my trip to PEI	90.0%	96.3%	95.8%	94.9%	99.8%	95.7%
My trip to PEI was good value for money spent	77.3%	88.1%	88.1%	94.0%	91.1%	89.1%

Note: Results were based on those who rated each of the items; while percent (%) indicates the percentage of respondents who rated the item 4 or 5 based on a 5-point Likert-type scale, M indicates mean values; **Green Bold Numbers** indicate significantly higher and **Red Bold Numbers** indicate significantly lower than other seasonal groups, while **Black Bold Numbers** position between the higher and lower groups, at 95% confidence level.

# 9-4. Future Behavioural Intentions

Figure 20: Likelihood of Recommending PEI as a Travel Destination to Others by Season

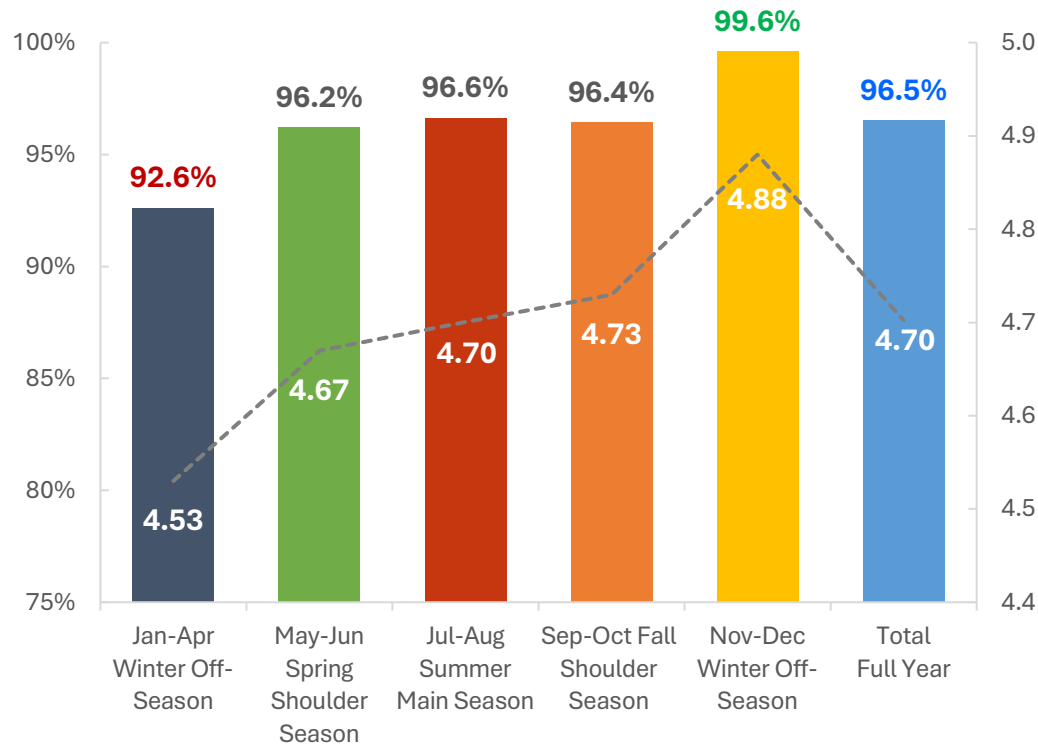

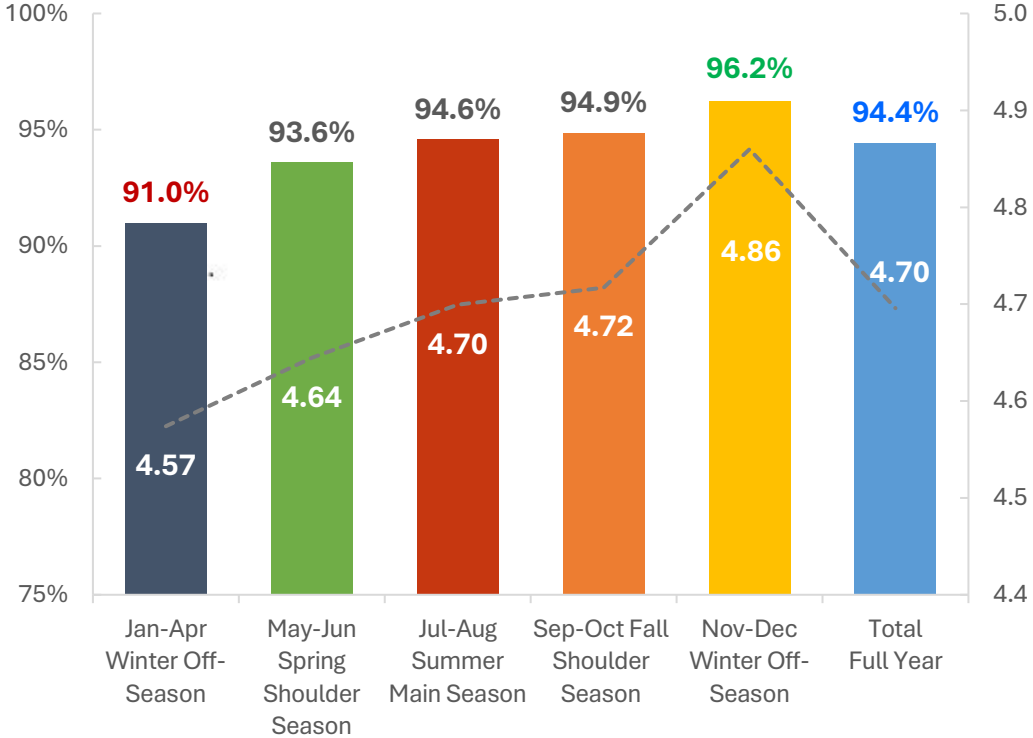

Figure 21: Likelihood of Visiting PEI Again by Season

Note: Results were based on those who rated each of the items; while percent (%) indicates the percentage of respondents who rated the item 4 or 5 based on a 5-point Likert-type scale, numbers inside of each column indicate mean values; **Green Bold Numbers** indicate significantly higher and **Red Bold Numbers** indicate significantly lower than other seasonal groups, while **Black Bold Numbers** position between the higher and lower groups, at 95% confidence level.
